GENERAL DESCRIPTION

MMS is a light, small, stackable side table. Its shape and variety of potential compositions make it the ideal table for anywhere in the home, either as at the bedside, an extra table or coffee table in the living room or other areas.

Also suitable as a complement for restaurants, cafeterias and hotels.

DIMENSIONS

MODELS

Single model.

MATERIALS AND FINISHES

The table is made up of 4 triangular solid oak legs joining at a cross in the same material. The top is made from oak plywood 20mm thick. This helps to achieve the correct horizontal alignment. The structure of the legs and cross is 10 mm below the top to ensure the tables can be stacked on top of each other.

All the pieces are glued together to ensure they are firm and in the right position.

The glue used is from the D-2 durability class, as per DIN EN-204.

The whole table is subsequently finished with water-based varnish.

The procedure used is the sand and strop method: two undercoats with sanding in-between the two layers, and a topcoat of water-based varnish.

This protects the table from the effects of atmospheric agents, also improving physical and chemical resistance.

PACKAGING, WEIGHT AND VOLUME

Weight: 4.5 kg

Dimensions: 52x52x40 cm

Volume: 0.10 m³

All packaging is made from recyclable double layer cardboard.
