Frame

Stainless steel structure polished to a high gloss.

Made up of a ring 190 mm in diameter, produced using 20x4 mm rods. This element serves as a base and also to house the enamelled ceramic container.

3 vertical bars 10 mm in diameter, and a ring 320 mm in diameter, also made from a rod, make up the exterior structure of the TOMBAL.

Another ring is welded 300 mm from the base. This is 190 mm in diameter and made with 5 mm rod, making the product stronger and also helping to support short umbrellas.

All elements are TIG-welded.

Dish

Circular dish made out of naturally coloured enamelled ceramic. The general dimensions are 190 mm in diameter and 70 mm high. This serves as a base for umbrellas or an ashtray, depending on its position.

PACKAGING, WEIGHT AND VOLUME

Weight: 6.5 kg

Dimensions: 35x35x65 cm

Volume: 0.08 m³

All packaging is made from recyclable double layer cardboard.
