AIM

This document provides information deemed relevant from the point of view of the environment, human health and toxicity. The aim of this self-declaration is merely to provide information and justification that this product is environmentally preferable over other similar products on the market.

ENVIRONMENTAL VALUES

1. Each element is easier to recycle as the product can be disassembled.
2. Both the stainless steel and the ceramic can be 100% recovered via recycling.
3. The surface of the base is finished in acrylic paint (containing acrylamide).
4. It contains no Volatile Organic Compounds.
5. Compliant with REACH - Regulation (EC) No. 1907/2006 of the European Parliament and of the Council, of 18 December 2006, due to the following: Mobles 114 declares that it maintains a correct channel of communication with its suppliers and that TOMBAL products do not contain raw materials that need to be registered; they do not contain any substances on the SVHC list (Substances of Very High Concern) published by ECHA (European Chemical Agency) in the quantities specified (the annual production of TOMBAL products does not exceed a presence of 1 tonne of these substances deemed of very high concern). The ring holding the feet has been finished in chrome and therefore contains chrome and nickel, fixated and therefore stabilised or chemically inert. Restrictions regarding the production, sale and use of these substances only apply in the case of direct and prolonged contact with the user's skin. For all these reasons, TOMBAL products are deemed to comply with the requirements of the REACH regulation.
