MATERIALS AND FINISHES

Body made of 0.8 mm thick steel and finished with 80 micron 30% matt textured epoxy powder paint, white RAL 9002 or black RAL 9004.

Inside the body there are two handles that hold the plastic bag, made of galvanized steel rod.

The support of the handles are two internal pieces made of black ABS. This model presents the entry of waste on the front face with an opening of 180x180 mm.

The ashtray cover, located in the upper part, is made of an extruded aluminum profile (alloy 6060) with an anodized finish.

The base of the bin is made of black ABS. A reticulated and ribbed inner face gives rigidity, and a smooth outer face houses 4 cavities to place 4 anti-slip rubber stops.

MAINTENANCE

Clean with a damp cloth with mild soap and water. Rinse and dry with a dry cloth. Avoid using abrasive products.
