## MATERIALS AND FINISHES

### Structure

Structure formed by 2 arch-shaped feet and 2 crossbars, which act as a portico. The entire assembly is welded with a continuous TIG seam, achieving great mechanical resistance. The tube has a 35 mm diameter section and the 4 ground support points are protected with black plastic caps.

### Table top

Piece made of 2 mm thick steel sheet machined by laser. With rounded edges\* It is fixed to the legs by means of 4 M8x50 screws that we thread into 4 M8 nuts, already welded to the top.

4 pieces of plastic injection, placed in the lower part of the table, give us the height and the necessary settlement to stack between them.

Available in 6 finishes: white RAL 9002, blue-grey RAL 7031, black RAL 9004, chestnut brown RAL 8015 and olive green RAL 7002. All metal parts are zinc plated and later painted with textured epoxy powder paint. 80 microns, 30% matte.

Stackable table (max. 5)

## MAINTENANCE

Clean with a damp cloth with mild soap and water. Rinse and dry with a dry cloth. Avoid using abrasive products.
