Structure

Structure made up with 3 feet welded with continuous TIG thread, thus achieving a great mechanic resistance.

The tube section is 35 mm diameter and the 3-point supports are protected with black plastic caps.

Table surface

Table surface is made of steel plate, 2 mm thick, and composed throughout a metal spinning process. It is fixed to the legs by means of 3 M8x55 screws and 3 M8 nuts, the latter being already welded to the table surface.

Three injection plastic components provide the required height and stability for their stacking.

PACKAGING, WEIGHT AND VOLUME

Table (1 unit)

Weight: 13.5 kg

Box dimensions: 69x69x74 cm

All packaging is made of double cardboard box, 100% recyclable.
