MATERIALS AND COLORS (steel and polypropylene)

RAL 9002 RAL 9004 RAL 7002 RAL 8015 RAL 7031

CERTIFICATIONS AND REGULATIONS

Flame retardant: UNE-EN 1021-1 and UNE-EN 1021-2

Public Usage Resistance: UNE-EN 16139

MAINTENANCE

Clean with a damp cloth with mild soap and water. Rinse and dry with a dry cloth. Avoid using abrasive products.

MATERIALS AND FINISHES

Structure

Structure composed of 5 parts.

The front legs and the rear structure are made of an aluminum tube with a diameter of 35x2.5 mm. The 3 central tubes are made of aluminum tube with a diameter of 30x2 mm.

The entire assembly is welded in a continuous TIG seam, achieving great mechanical resistance.

In the model with arms, these are made of aluminum tube 30x2 mm in diameter, and are welded to the tube behind the chair and to the front legs.

The 4 ground support points are protected with black plastic caps. All metal parts are painted with 80 micron epoxy powder paint, 30% textured matt.

Seat

Seat made of injected polypropylene. The seat is fixed to the structure by means of 4 stops made of polyamide and elastomer and 4 DIN M6x55 mm screws, which are threaded into brass inserts already located in the same injection of the seat.

These stops also serve as a support point for the chair when we stack them, preventing them from scratching each other.

UV filter for external application.

The chair is available in 6 finishes: white RAL 9002, blue-grey RAL 7031, black RAL 9004, chestnut brown RAL 8015, olive green RAL 7002.

Stackable chair (max. 6)
