Structure

Made from steel bars. The external perimeter is 10 mm in diameter and the internal part 6mm in diameter.

The whole frame is TIG welded, ensuring great mechanical strength.

Circular steel pieces have been welded to the 4 floor supports (diameter 35 mm and height 8mm) and plastic (PE) ferrules have been added, suitable for uneven surfaces.

Zinc-coated chair, finished with epoxy powder coating, 80 microns thick, 30% matte textured.

Seat

There is an optional polyurethane foam (PUR) cushion, finished in the same colours as the chair.

This cushion has 4 circular tabs underneath that adjust to the reticulated chair's frame to keep the cushion in the right position.

PACKAGING

Chairs are supplied already assembled and individually boxed.

Weight: 6.5 kg

Size: 57x60x80 cm

Volume: 0.27 m³

All packaging is made of double cardboard box, 100% recyclable.
